HandiQuilter

BY QUILTERS FOR QUILTERS
IMPORTANT SAFETY INSTRUCTIONS

When using an electrical appliance, basic safety precautions should always be followed, including the following:
This sewing machine is designed and manufactured for household use only.
Read all instructions before using this sewing machine.

DANGER— To reduce the risk of electric shock:
1. An appliance should never be left unattended when plugged in. Always unplug this sewing machine from the electric outlet immediately after using and before cleaning.

WARNING— To reduce the risk of burns, fire, electric shock, or injury to persons:
1. Do not allow to be used as a toy. Close attention is necessary when this sewing machine is used by or near children.
2. Use this appliance only for its intended use as described in this owner’s manual.
   Use only attachments recommended by the manufacturer as contained in this owner’s manual.
3. Never operate this sewing machine if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped into water.
   Return this sewing machine to the nearest authorized dealer or service center for examination, repair, electrical or mechanical adjustment.
4. Never operate the appliance with any air opening blocked. Keep ventilation openings of this sewing machine and foot controller free from accumulation of lint, dust and loose cloth.
5. Never drop or insert any object into any opening.
6. Do not use outdoors.
7. Do not operate where aerosol (spray) products are being used or where oxygen is being administered.
8. To disconnect, turn all controls to the off (“O”) position, then remove plug from outlet.
9. Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.
10. Keep fingers away from all moving parts. Special care is required around the sewing machine needle and/or cutting blade.
11. Always use the proper needle plate. The wrong plate can cause the needle to break.
12. Do not use bent needles.
13. Do not pull or push fabric while stitching. It may deflect the needle causing it to break.
14. Switch this sewing machine off (“O”) when making any adjustment in the needle area, such as threading the needle, changing the needle, threading the bobbin or changing the presser foot, and the like.
15. Always unplug this sewing machine from the electrical outlet when removing covers, lubricating, or when making any other adjustments mentioned in this owner’s manual.

SAVE THESE INSTRUCTIONS

For Europe only:
This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.

For outside Europe (except U.S.A and Canada):
This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
Children should be supervised to ensure that they do not play with the appliance.

Please note that on disposal, this product must be safely recycled in accordance with relevant National legislation relating to electrical/electronic products. If in doubt please contact your retailer for guidance. (European Union only)

37. Free-arm
38. Drop feed lever
39. Presser foot lifter
40. Power inlet
41. Foot control jack
42. Power switch
43. Ventilation openings
44. Handwheel
45. Feed balancing dial

NOTE:
To carry the sewing machine, hold the carrying handle with your hand, and support the sewing machine with the other hand.

NOTE:
Design and specifications are subject to change without prior notice.
Standard Accessories

1. Zigzag foot: A (set on the machine)
2. Zipper foot: E
3. Satin stitch foot: F
4. Automatic buttonhole foot: R
5. Blind hem foot: G
6. Overedge foot: C
7. Spool holder (X 2) (large) (1 set on the machine)
8. Spool holder (X 2) (small)
9. Extra spool pin
10. Bobbins (X 4) (1 set on the machine)
11. Assorted needle set
12. Seam ripper (Buttonhole opener)
13. Lint brush
14. Screwdriver
15. Stitch Chart
16. Instruction book
17. Instructional DVD
18. Hard cover
19. Large extension table
20. Foot control
21. Power cable*

* The power cable included may differ from the illustration.
Large Extension Table

Attaching the table
Pull the table away from the machine.
Spread the legs of large extension table.
Holding the table with both hands and slide it gently to the right.

Adjust the table height
Turn setscrews of the table legs with a screwdriver (optional).

Stitch Chart
Insert the stitch chart ① into the chart holder ②.
Insert the pin ③ into the hole for the stitch chart ④.

① Stitch chart
② Chart holder
③ Pin
④ Hole for stitch chart

You can flip the chart to the back of the machine when it is not in use.
GETTING READY TO SEW

Connecting the Power Supply

Using the foot control
Turn off the power switch.
Insert the pin connector into the jack.
Insert the machine plug into the power inlet.
Insert the power supply plug into the wall outlet.
Turn on the power switch.

1. Power switch
2. Pin connector
3. Jack
4. Machine plug
5. Power inlet
6. Power supply plug
7. Wall outlet

The foot control sign will be displayed when the foot control is connected to the machine.

WARNING:
While in operation, always keep your eyes on the sewing area and do not touch any moving parts such as the thread take-up lever, handwheel or needle.
Always turn off the power switch and unplug from the power supply:
- when leaving the machine unattended.
- when attaching or removing parts.
- when cleaning the machine.

Do not place anything on the foot control.

Before Using Your Sewing Machine
Before using your sewing machine for the first time, place a scrap of fabric under the presser foot and run the machine without thread for a few minutes. Wipe away any oil which may appear.

Using the start/stop button
Turn off the power switch.
Insert the machine plug into the power inlet.
Insert the power supply plug into the wall outlet.
Turn on the power switch.

1. Power switch
2. Machine plug
3. Power inlet
4. Power supply plug
5. Wall outlet
6. Start/Stop button

NOTE:
The start/stop button does not work when the foot control is connected.

Operating Instructions:
The symbol “O” on the switch indicates the “off” position of the switch.
Foot control model 21371 or YC-485EC-1 is used with this sewing machine.

For the U.S.A and Canada only:
For appliances with a polarized plug (one blade wider than the other): To reduce the risk of electric shock, this plug is intended to fit in a polarized outlet only one way. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not modify the plug in any way.
Controlling Sewing Speed

Speed control slider
Sewing speed can be varied by the speed control slider according to your sewing needs.
To increase sewing speed, move the slider to the right.
To decrease sewing speed, move the slider to the left.

Foot control
Depress the foot control to start the machine.
The further down you press on the foot control, the faster the machine runs.
The maximum sewing speed can be varied by the speed control slider.

NOTE:
The machine will not run and the presser foot mark will blink if you start the machine with the presser foot in the up position. Lower the presser foot and press the foot control.

Extension Table
The extension table provides an extended sewing area and can be easily removed for free-arm sewing.

Detaching the table
Pull the table away from the machine, as illustrated.

Attaching the table
Slide the extension table along the free-arm and insert the guides into the holes until the table snaps into the machine.

Accessory storage
Accessories are stored inside the extension table.
Pull the lid toward you to open the accessory storage.

Free-arm Sewing
Free-arm is useful for sewing tubular garments and for darning knee or elbow areas.
Machine Operating Buttons

1. **Start/Stop button**
   Press this button to start or stop the machine. The machine starts running slowly for the first few stitches, and it then runs at the speed set by the speed control slider. The machine runs slowly as long as this button is being pressed.

   **NOTE:**
   - The start/stop button cannot be used when the foot control is connected to the machine.
   - The machine will not run and the presser foot mark will blink if you start the machine with the presser foot in the up position. Lower the presser foot and press the start/stop button.

2. **Reverse button**
   - **When stitch pattern 00, 03, 06 or 07 is selected:**
     The machine will sew in reverse as long as the reverse button is pressed. Release the button to sew forward. When the machine is stopped and foot control is disconnected, the machine will sew in reverse slowly as long as the reverse button is pressed. Release the button to stop the machine.
   - **When any other stitches are selected:**
     If you press the reverse button when sewing any other patterns, the machine will immediately sew locking stitches and automatically stop.

   **NOTE:**
   There will be particular functions of the reverse button when pattern 01, 02, 20 or 21 is selected. Refer to page 24, 35 and 36 for instructions.

3. **Auto-lock button**
   - **When stitch pattern 00, 03, 06 or 07 is selected:**
     Press the auto-lock button to sew a locking stitch immediately. The machine will automatically stop.
   - **When any other stitches are selected:**
     Press the auto-lock button to sew a locking stitch at the end of current pattern. The machine will automatically stop.

4. **Needle up/down button**
   Press the needle up/down button to bring the needle up or down.

5. **Thread cutter button**
   Press the thread cutter button to trim the threads after sewing. The thread cutter mark will blink while the machine cuts the threads.

6. **Speed control slider**
   Maximum sewing speed can be adjusted with the speed control slider. Refer to page 7.
LCD Display
The LCD display shows following information when the machine is turned on.
① Identification letter of the recommended foot
② Stitch pattern number
③ Stitch width
④ Stitch length

Function Keys
Selecting the Stitch Patterns
To select the desired stitch pattern, press the arrow keys (① and ②) until the pattern number of the desired stitch is indicated.
To change the first digit ③ of the stitch pattern number, press the arrow keys ① under the first digit of the pattern number.
To change the second digit ④ of the stitch pattern number, press the arrow keys ② under the second digit of the pattern number.
① Arrow keys (first digit)
② Arrow keys (second digit)
③ First digit
④ Second digit

Direct pattern selection
You can select stitch patterns 00, 06, 09 and 18 directly by pressing the corresponding direct pattern selection key ⑤.
The stitch image of stitch pattern are indicated on each key.

Stitch width adjusting key
Press “+” or “−” ⑥ to change the stitch width or needle drop position, depending on the selected stitch pattern. Refer to pages 23, 26 and 32.

Stitch length adjusting key
Press “+” or “−” ⑦ to change the stitch length of the selected pattern. You can also adjust the buttonhole density, the evenness of darning, and the size of eyelet with this key. Refer to pages 23, 26 and 32.

Thread cut memory key
To cut the threads automatically after locking stitches, press the thread cutter memory key ⑧ (Refer to page 21).
Presser Foot Lifter
The presser foot lifter raises and lowers the presser foot. You can raise the foot about 1/4” (0.7 cm) higher than the normal up position for easy removal of the presser foot, or to help you place thick material under the foot.
1. Presser foot lifter
2. Normal up position
3. Highest position

Changing the Presser Foot

![Diagram of presser foot changing]

**CAUTION:**
Turn OFF the power switch before changing the foot. Always use the proper foot for the selected pattern. The wrong foot can cause the needle to break. Each foot is marked with an identification letter.
1. Identification letter

Removing the presser foot
Raise the needle to its highest position by turning the handwheel counterclockwise. Raise the presser foot, and press the lever on the back of the foot holder.
2. Lever

Attaching the presser foot
Place the selected presser foot so that the pin on the foot lies just under the groove in the foot holder.
Lower the presser bar to lock the foot into the place.
3. Groove
4. Pin

Removing and Attaching the Foot Holder

![Diagram of foot holder changing]

**CAUTION:**
Turn OFF the power switch before detaching or attaching foot holder.

Removing the foot holder
Remove the setscrew by turning it counterclockwise with a screwdriver.

Attaching the foot holder
Align the hole in the foot holder with the threaded hole in the presser bar. Fit the setscrew into the hole. Tighten the setscrew by turning it clockwise with the screwdriver.
1. Setscrew
2. Foot holder
3. Hole
4. Threaded hole

Presser Foot Pressure Dial
Foot pressure can be adjusted by turning the presser foot pressure dial.
Set the pressure between “3” and “6” for ordinary fabrics.
Set the pressure between “1” and “3” for fine fabrics and applique sewing.
Set the pressure between “5” and “6” for heavyweight fabrics.
1. Presser foot pressure dial
Adjusting the Needle Thread Tension

Straight stitch balanced tension

The ideal straight stitch has threads locked between two layers of fabric, as illustrated (magnified to show detail). If you look at the top and bottom of the seam, notice that the stitches are evenly balanced.

1. Needle thread (top thread)
2. Bobbin thread (bottom thread)
3. To loosen
4. To tighten

When adjusting the needle thread tension, the higher the number, the tighter the top thread tension.

Results depend on:
- stiffness and thickness of the fabric
- number of fabric layers
- type of stitch

Tension is too tight

The bobbin thread shows through on the right side of the fabric, and the stitch feels bumpy. Turn the dial to a lower number to loosen the needle thread tension.

1. Needle thread (top thread)
2. Bobbin thread (bottom thread)
3. To loosen tension
4. Right side (top side) of fabric
5. Wrong side (bottom side) of fabric

Tension is too loose

The needle thread shows through on the wrong side of the fabric, and the stitch feels bumpy. Turn the dial to a higher number to tighten the needle thread tension.

1. Needle thread (top thread)
2. Bobbin thread (bottom thread)
3. To tighten tension
4. Right side (top side) of fabric
5. Wrong side (bottom side) of fabric
Zigzag stitch
For an ideal zigzag stitch, the bobbin thread does not show on the right side (top side) of the fabric, and the needle thread shows slightly on the wrong side (bottom side) of the fabric. See the illustrations for the correct appearance. To match this appearance, adjust the needle tension as necessary.

Balanced tension
Minimize the amount of needle thread visible on the wrong side (bottom side) of the fabric without causing excessive puckering, or causing the bobbin thread to show on the right side (top side) of the fabric. Results vary with fabric, thread and sewing conditions.

Tension is too tight
The corner of each zigzag pulls together on the right side of the fabric.

Tension is too loose
The corner of each zigzag point pulls together on the wrong side of the fabric.
Dropping or Raising the Feed Dog

The drop feed lever is located underneath the free arm bed on the back of the machine.

To drop the feed dog, push the lever in the direction of the arrow ①.

To raise the feed dog, push the lever in the direction of the arrow ②, as illustrated, and turn the handwheel toward you.

The feed dog must be up for normal sewing.

**NOTE:**
Set the stitch length value at the minimum when lowering the feed dog.

---

Needle Stop Position Setting

You can set the needle stop position to up or down when the machine stops.

To enter the needle stop position setting mode, turn the power off.

Press and hold the needle up/down button ①, and turn the power switch on. Hold then needle up/down button until the needle stop position setting screen appears as shown.

The default setting is down and “dn” sign appears on the screen.

Press the needle up/down button ①.

The “uP” sign appears and the needle stop position is set to up.

Press the START/STOP button ② to apply the setting.
changing the needle

**caution:**

turn off the power switch before changing the needle.
raise the needle to its highest position by turning the handwheel counterclockwise, and lower the presser foot.
a loose needle or a loose screw may cause machine malfunction or needle to break.

loosen the needle clamp screw by turning it counterclockwise. remove the needle from the needle clamp.
insert a new needle into the needle clamp with the flat side to the rear. when inserting the needle into the needle clamp, push it up as far as it will go.
tighten the needle clamp screw firmly by turning it clockwise.

1. needle clamp screw
2. flat side

to see if the needle is in good condition, place the flat side of the needle onto something flat (needle plate, glass etc.). the gap between the needle and the flat surface should be consistent. never use a bent or blunt needle.
a damaged needle can cause permanent snags or runs in knits, fine silks and silk-like fabrics.

</tbody>
</table>

**note:**

3 x #14/90 needles are included in the envelop.
(part no. 639804000).

**fabric and needle chart**

- for general sewing, use needle size 11/75 or 14/90.
- a fine thread and needle should be used for sewing lightweight fabrics, so the fabric will not be marred.
- heavy fabrics require a needle large enough to pierce the fabric without fraying the needle thread.
- always test the needle size on a small scrap of the fabric that will be used for actual sewing.
- in general, use the same thread for the needle and bobbin.

**note:**

when sewing stretch fabrics, very fine fabrics and synthetics, use a blue tip needle (part no. 990311000, sold separately). the blue tip needle effectively prevents skipped stitches.
Setting the Spool of Thread

Horizontal spool pin
Lift up the spool pin. Place a spool of thread on the spool pin. Attach the large spool holder, and press it firmly against the spool of thread so that the spool rests on the supporter.

- Spool pin
- Spool of thread
- Large spool holder
- Supporter

The small spool holder is used with narrow or small spools of thread.

- Small spool holder

Extra spool pin
The extra spool pin is for winding bobbins without unthreading the machine. Insert the extra spool pin into the hole. The extra spool pin should point to the bobbin winder tension disk. Draw the thread from the spool and pass the thread around the bobbin winding tension disk as shown.

- Extra spool pin
- Hole for extra spool pin
- Bobbin winder tension disk

Bobbin Winding

Removing the bobbin
Gently slide the hook cover release button to the right and remove the hook cover plate. Lift out the bobbin.

- Hook cover release button
- Hook cover plate
- Bobbin

NOTE:
Use the “J” plastic bobbins for horizontal hook (marked with “J” ④). Using other bobbins, such as pre-wound paper bobbins, may cause stitching problems and/or damage to the bobbin holder.
Winding the bobbin

**NOTE:**
Set the speed control slider at its fastest position for bobbin winding.

1. Draw the thread from the spool and pass the thread around the bobbin winding tension disk.
   - Bobbin winding tension disk

2. Thread through the hole in the bobbin from the inside to the outside.
3. Put the bobbin on the bobbin winder spindle.

4. Push the bobbin to the right.
   - The bobbin icon appears on the LCD display.
   - Bobbin icon

5. With the free end of the thread held in your hand, start the machine. Stop the machine when it has wound a few layers, and then cut the thread close to the hole in the bobbin.

6. Start the machine. When the bobbin is fully wound, it will stop spinning automatically.
   - Stop the machine and return the bobbin winder to its original position by moving the spindle to the left.

**NOTE:**
Do not move the bobbin winder spindle while the machine is running.

7. Remove the bobbin. Cut the thread as shown.
   - Return the speed control slider position.
**Inserting the bobbin**

**CAUTION:**
Turn OFF the power switch before inserting the bobbin and threading the bobbin holder.

1. Place a bobbin in the bobbin holder with the thread running off counterclockwise as shown on the hook cover plate.
   1. End of thread
   2. Bobbin holder
   3. Hook cover plate

2. Hold the bobbin with your fingertip so it does not rotate. Guide the thread into the front notch of the bobbin holder. Pull the thread to the left to pass it under the guide.
   4. Front notch
   5. Guide

3. Draw the thread to the left to pass it into the guide path marked “1”. Make sure that the thread comes out from the side notch of the bobbin holder.
   6. Guide path 1
   7. Side notch

**NOTE:**
If the thread does not come out from the side notch, rethread from step 1.

4. Continue to draw the thread along the guide path marked “2” and pull the thread to the right through the slit. The thread will be cut to a proper length and held in place.
   8. Guide path 2
   9. Slit (Thread cutter)

5. Set the left edge of the hook cover plate into opening. Push down the hook cover plate to fit in place.
   10. Hook cover plate

**NOTE:**
Unless otherwise noted, you can start sewing without drawing up the bobbin thread. Refer to page 20 for how to draw up the bobbin thread.
Threading the Machine

1. Turn the power switch off.
   Draw the end of the thread around the upper thread guide.

2. While holding the thread near the spool [2], draw the end of the thread down around the check spring holder [3].
   - [2] Spool
   - [3] Check spring holder

3. Firmly draw the thread up from right to left over the take-up lever, and down into the take-up lever eye.

4. Pass the thread through the lower thread guide. Slide the thread behind the needle bar thread guide on the left.

5. Use the needle threader to thread the needle (see page 19).
Needle Threader

**CAUTION:**
Turn off the power switch when using the needle threader.

1. Lower the presser foot. Press the needle up/down button ① to raise the needle to its highest position. Turn the power switch off.

2. Pull down the needle threader knob as far as it will go. The hook comes out through the needle eye from behind.
   - ① Needle up/down button
   - ② Knob
   - ③ Hook

3. Draw the thread from the left guide to the right guide and under the hook.
   - ④ Left guide
   - ⑤ Right guide

4. Draw the thread to the front along the right side of the right guide.

5. Raise the knob in the direction of the arrow, drawing the thread loop through the needle.
   - ⑥ Thread loop

6. Pull the thread through the needle eye.

**NOTE:**
The needle threader can be used with a #11 to #16 needle or a blue tip needle. Thread sizes 50 to 90 are recommended.
Drawing up the Bobbin Thread

1. Raise the presser foot. Hold the needle thread lightly with your left hand.

2. Turn the power switch on. Press the needle up/down button twice to lower and raise the needle to pick up the bobbin thread. Needle up/down button

3. Pull both threads 4” to 6” (10 to 15 cm) under and behind the presser foot.
Straight Stitch Sewing

Stitch pattern: 00 or 03
Needle thread tension: 2 to 6
Presser foot: Zigzag foot A

NOTE:
When sewing with the satin stitch foot F or buttonhole foot R, pull the thread to the left to hold the thread.

Starting to sew
Raise presser foot and position the fabric next to a seam guide line on the needle plate. Lower the needle to the point where you want to start.

Pull the thread toward the rear and lower the presser foot.

Press the start/stop button or depress the foot control to start sewing.

Gently guide the fabric along a seam guide line letting the fabric feed naturally.

Securing seam
To secure the end of seam, press the reverse button and sew several reverse stitches.

Press the thread cutter button to cut the threads.

Use the thread cutter on the face cover to cut thicker threads.

Auto Thread Cutting
To cut the threads automatically after locking stitches, press the thread cutter memory key.

The thread cutter icon appears on the LCD display.

When buttonhole, tacking, darning or eyelet is selected, the machine will cut the threads automatically after sewing is finished.

Press the auto-lock button or reverse button to cut the threads automatically after locking stitches when other stitch is selected.

NOTE:
Use the thread cutter on the face cover if the thread is 30 or thicker.
**Changing Sewing Direction**

Stop the machine.
Raise the presser foot.
Pivot the fabric around the needle to change the sewing direction as desired.
Lower the foot and start sewing in a new direction.

**NOTE:**
Lower the needle by pressing needle up/down button if the needle stop position is set at up position.

**Sewing from the Edge of Thick Fabric**

The black button on the zigzag foot locks the foot in the horizontal position.
This is helpful when starting sewing from the far edge of thick fabrics or sewing across a hem.
Lower the needle into the fabric at the point where you wish to start sewing.
Lower the foot while pushing the black button in. The foot is locked in the horizontal position to avoid slipping.
The button is released automatically after sewing a few stitches.

1. Black button
2. Thick fabrics

**Using Seam Guides**

The seam guides on the needle plate and the hook cover plate help you to measure seam allowance.
The numbers on the needle plate indicate the distance from the center needle position in inches and millimeters.

1. Center needle position

The front seam guides are marked at 1/4”, 3/8” and 5/8” from the center needle position.

2. Front seam guide at 1/4”
3. Front seam guide at 3/8”
4. Front seam guide at 5/8”

The angle scales are marked at 45, 60, 90 and 120 degrees.

5. Angle scales
6. Cornering guide

**Turning Square Corners**

When sewing with fabric edge at 5/8” seam guide, to turn a square corner so that sewing continues at same distance from edge.
Stop the machine when front edge of fabric reaches the cornering guide lines 6.
Raise the presser foot and turn the fabric counterclockwise 90°.
Lower the presser foot, and begin stitching in the new direction.

**NOTE:**
Lower the needle by pressing needle up/down button if the needle stop position is set at up position.
Altering the Needle Drop Position
The needle drop position can be altered for straight stitch patterns 00 to 04 and 36.

Press the “–” sign on the stitch width adjusting key to move the needle to the left.
Press the “+” sign on the stitch width adjusting key to move the needle to the right.

Altering the Stitch Length
The stitch length can be altered.

Press the “+” sign on the stitch length adjusting key to increase the stitch length.
Press the “–” sign on the stitch length adjusting key to decrease the stitch length.

Stitch width adjusting key
Stitch length adjusting key
Stitch length
Lock-a-matic Stitch

① Stitch pattern: 01
② Thread tension dial: 2 to 6
③ Presser foot: Zigzag foot A

Use this stitch to secure the beginning and the end of a seam with backstitching. When you reach the end of the seam, press the reverse button once. The machine will sew four reverse stitches, four forward stitches, and then stop sewing automatically.

① Reverse button

Locking Stitch

① Stitch pattern: 02
② Thread tension dial: 2 to 6
③ Presser foot: Zigzag foot A

This unique stitch is used where an invisible locking stitch is needed. Lower the needle close to the front edge of the fabric. The machine will sew several locking stitches in place and continue sewing forward. When you press the reverse button at the end of the seam, the machine will sew several locking stitches in place, then stop sewing automatically.

① Reverse button

Triple Stretch Stitch

① Stitch pattern: 04
② Thread tension dial: 2 to 6
③ Presser foot: Zigzag foot A

This strong, durable stitch is recommended when both elasticity and strength are necessary in order to insure comfort and durability. Use it to reinforce areas such as crotch and armhole seams. Also use for extra reinforcement when constructing items such as backpacks.
This stitch is a narrow stretch stitch designed to eliminate puckering on knit fabrics and bias seams, while permitting the seam to be pressed completely open flat. Use this stitch for seaming fine fabrics.

Sculpture Stitches

You can achieve a lovely hand-worked look when topstitching suits, blazers, jumpers, and denim outfits with these stitches.
The zigzag stitch is one of the most useful and versatile stitches. It is used for overcasting, mending, appliqué, and also used as a decorative stitch.

**NOTE:**
Use interfacing when sewing on stretch fabrics such as knit, jersey or tricot.

**Zigzag Stitch**

1. Stitch pattern: 06
2. Thread tension dial: 3 to 7
3. Presser foot: Zigzag foot A

**Altering the stitch width**

Press the “+” sign on the stitch width adjusting key to increase the stitch width.

Press the “–” sign on the stitch width adjusting key to decrease the stitch width.

1. Stitch width adjusting key
2. Stitch width

The stitch width of pattern 06 can be changed without changing its center needle position (M) 3.

3. Center needle position

**Altering the stitch length**

Press the “+” sign on the stitch length adjusting key to increase the stitch length.

Press the “–” sign on the stitch length adjusting key to decrease the stitch length.

1. Stitch length adjusting key
2. Stitch length
Overcasting with Zigzag Stitch
1. Stitch pattern: 06
2. Thread tension dial: 3 to 7
3. Presser foot: Overedge foot C

Place the fabric edge next to the guide on the foot and sew while guiding the fabric along the guide.

**CAUTION:**
When using an overedge foot, make sure to set the stitch width at 4.5 or wider, otherwise the needle may hit the wires on the foot.

Multiple Zigzag Stitch
1. Stitch pattern: 07
2. Thread tension dial: 3 to 7
3. Presser foot: Zigzag foot A

This stitch is used to finish a raw edge of synthetics and other stretch fabrics that tend to pucker.
Sew along the fabric edge leaving an adequate seam allowance.
After sewing, trim off the seam allowance closer to the stitches.

This stitch is also excellent for darning and mending tears.

Overedge Stitch
1. Stitch pattern: 08
2. Thread tension dial: 3 to 7
3. Presser foot: Overedge foot C

This stitch is used to seam and overcast fabric edges at one time.
Use this stitch when you do not need to open seams flat.
Sew while guiding the fabric edges along the guide on the foot.

**NOTE:**
The stitch width cannot be adjusted to less than 4.5 to prevent the needle from hitting the wires on the foot.
**Knit Stitch**

1. Stitch pattern: 09
2. Thread tension dial: 3 to 6
3. Presser foot: Zigzag foot A

Place your fabric to allow a 5/8” (1.5 cm) seam. Trim excess close to the stitching. Be careful not to cut the stitches.

**Double Overedge Stitch**

1. Stitch pattern: 10
2. Thread tension dial: 3 to 7
3. Presser foot: Overedge foot C

This stitch is excellent for sewing fabrics that tend to fray extensively such as linens and gabardines. Two rows of zigzag stitches are simultaneously sewn over the edge to insure that your seams will not ravel. Sew while guiding the fabric edges along the guide on the foot.

**NOTE:**
The stitch width cannot be adjusted to less than 4.5 to prevent the needle from hitting the wires on the foot.

**Attaching Elastic**

1. Stitch pattern: 16
2. Thread tension dial: 1 to 4
3. Presser foot: Satin stitch foot F

Mark the elastic into quarters. Match those to the center front, center back and side seams, and pin the elastic to the fabric. Place the elastic under the foot and stitch into place while stretch the elastic evenly.
**Buttonholes**

The following 3 types of buttonholes are available.

1. **Square buttonhole**  
   This buttonhole is widely used on medium to heavy fabrics.

2. **Round-end buttonhole**  
   This buttonhole is used on fine to medium weight fabrics, especially for blouses and children's clothes.

3. **Keyhole buttonhole**  
   The keyhole buttonhole is widely used on medium to heavy fabrics. It is also suitable for larger and thicker buttons.
The size of a buttonhole is automatically set by placing a button in the rear of automatic buttonhole foot R. The button holder of the foot takes a button size of 1 cm (3/8") to 2.5 cm (1") in diameter. When selecting the buttonholes, the LCD display advise you to lower the buttonhole lever.

**NOTE:**
It is sometimes necessary to change buttonhole size to match certain heavy or specific fabrics and threads. Make a test buttonhole on an extra piece of the fabric to check your settings. The preset width of the buttonhole is suited for ordinary buttons. Apply an interfacing to stretch or fine fabrics.

**Square Buttonhole**
- **Stitch pattern:** 17
- **Thread tension dial:** 1 to 4
- **Presser foot:** Automatic buttonhole foot R

Sewing
1. Pull the button holder to the back, and place the button in it. Push it together tightly on the button.
   - **Button holder**

   **NOTE:**
   If the button is extremely thick, make a test buttonhole on an extra piece of the fabric. If it is difficult to fit the button through the test buttonhole, you can lengthen the buttonhole by pulling the button holder back a little. The length of the buttonhole will be increased.
   - **Extra gap**

2. Press the needle up/down button to raise the needle. Attach the automatic buttonhole foot R snapping the pin into the groove of the foot holder. You may lift the presser foot lifter to the extra lifted position when placing the automatic buttonhole foot under the foot holder. Raise the presser foot.
   - **Groove**
   - **Pin**

3. Draw the needle thread to the left through the hole of foot. Mark the buttonhole position on the fabric and place it under the buttonhole foot. Lower the needle at the starting point by turning the handwheel.
   - **Starting point**
4 Lower the presser foot and pull the buttonhole lever down as far as it will go.

6 Buttonhole lever

**NOTE:**
The reference lines on the buttonhole foot can be used as a positioning guide. Make sure there is no gap between the slider and stopper, otherwise the buttonhole will be out of position or there will be a sewing gap.

- No gap
- Starting point
- Reference lines
- Slider
- Stopper
- Sewing gap

5 Start sewing while pulling the needle thread lightly to the left. After sewing a few stitches, free the thread and continue sewing.

**NOTE:**
If you start sewing without pulling down the buttonhole lever, the LCD display will show a warning and the machine will stop after a few stitches. Pull the buttonhole lever down and start sewing.
Altering the buttonhole width
Press the “+” sign on the stitch width adjusting key to increase the buttonhole width.
Press the “–” sign on the stitch width adjusting key to decrease the buttonhole width.

NOTE:
The buttonhole width can be adjusted from 2.5 to 7.0.

Altering the buttonhole density
Press the “+” sign on the stitch length adjusting key to increase the buttonhole density.
Press the “–” sign on the stitch length adjusting key to decrease the buttonhole density.

NOTE:
The buttonhole density can be adjusted from 0.2 to 0.8.

The buttonhole is sewn in the sequence as shown. When the buttonhole is finished, the machine will stop automatically with the needle in the up position.

Remove the fabric and place a pin just below the bartack to prevent accidentally cutting the stitches. Cut the opening with the seam ripper.

Double layer buttonhole
To make a sturdy buttonhole, sew another layer of buttonhole stitches over the previous stitches. After the buttonhole is finished, do not raise the foot or buttonhole lever, simply start the machine again.

NOTE:
If the fabric is not feeding smoothly when sewing a double layer buttonhole, increase the buttonhole density.

When buttonhole sewing is finished, push the buttonhole lever upward as far as it will go.

When the buttonhole is sewn, the machine will stop automatically with the needle in the up position.

The buttonhole is sewn in the sequence as shown.

NOTE:
If the fabric is not feeding smoothly when sewing a double layer buttonhole, increase the buttonhole density.

Altering the buttonhole width
Press the “+” sign on the stitch width adjusting key to increase the buttonhole width.
Press the “–” sign on the stitch width adjusting key to decrease the buttonhole width.

NOTE:
The buttonhole width can be adjusted from 2.5 to 7.0.

Altering the buttonhole density
Press the “+” sign on the stitch length adjusting key to increase the buttonhole density.
Press the “–” sign on the stitch length adjusting key to decrease the buttonhole density.

NOTE:
The buttonhole density can be adjusted from 0.2 to 0.8.
Round-end and Fine Fabric Buttonhole

1. Stitch pattern: 18
2. Thread tension dial: 1 to 4
3. Presser foot: Automatic buttonhole foot R

Sewing procedure is the same as square buttonhole. The buttonhole width can be varied from 2.5 to 5.5. The stitch density can be varied from 0.2 to 0.8.

Keyhole Buttonholes

1. Stitch pattern: 19
2. Thread tension dial: 1 to 4
3. Presser foot: Automatic buttonhole foot R

Sewing procedure is the same as square buttonhole. The buttonhole width can be varied from 5.5 to 7.0. The stitch density can be varied from 0.3 to 0.8.

Use the seam ripper and an eyelet punch to open the buttonhole.

1. Eyelet punch (not provided with the machine)
Use the same procedure as the square buttonhole sewing. Set the stitch width to match the thickness of the cord used.

With the buttonhole foot raised, hook the filler cord on the spur at the back of the buttonhole foot. Bring the ends toward you under the buttonhole foot, clearing the front end.

Hook the filler cord into the forks on the front of the buttonhole foot to hold them tight.

Lower the needle into the garment where the buttonhole will start, and lower the foot.

1. Spur
2. Forks

Start the machine and sew the buttonhole. Each side of the buttonhole and the bartacks will be sewn over the cord.

Remove the fabric from the machine, and cut the sewing threads only.

3. Needle thread
4. Bobbin thread

Pull the loose ends of the filler cord to tighten it. Thread the each end of the cord through a hand-sewing needle. Then draw the both ends to the wrong side of the fabric and knot.

NOTE:
Cut the filler cord at both ends, if the filler cord is stitched on the fabric and cannot be pulled.
Darning Stitch

1. Stitch pattern: 20
2. Thread tension dial: 3 to 6
3. Presser foot: Automatic buttonhole foot R

Starting to sew

1. Attach the automatic buttonhole foot R and pull the button holder 1 all the way out. Draw the needle thread to the left through the hole of foot. Button holder
2. Place the fabric under the foot, and lower the needle at the starting point 2. Then lower the foot. Starting point
3. Start the machine. The machine will sew locking stitch, 16 rows of darning, locking stitch again and stop automatically. Start the machine again and continue sewing until the machine stops automatically. Reverse button
4. Turn the fabric and repeat sewing in different direction. Required length
5. 3/4” (2 cm)
6. 9/32” (0.7 cm)

Sewing a shorter darning

To sew a darning shorter than 3/4” (2 cm), first stop the machine after sewing the required length 6, then press the reverse button 5. The required length 6 has been determined. Start the machine again and continue sewing until the machine stops automatically.

Starting point
5. Reverse button
6. Required length
7. Starting point

Sewing a same-sized darning

Simply start the machine to sew another darning at the same size.

NOTE:
To reset the size of the darning, select the other stitch pattern and reselect the darning stitch.

Adjusting the evenness of darning

Correct the evenness of the darning as follows: “d5” is the default setting value. When the right side of the darn is lower than the left side, press the “+” sign on the stitch length adjusting key 1 to set the value to “d6” to “d9”, and make the darn even.

When the left side of the darn is lower than the right side, press the “-” sign on the stitch length adjusting key 1 to set the value to “d1” to “d4”, and make the darn even.

1. Stitch length adjusting key
Tacking
Tacking is used to reinforce pockets, crotches and belt carriers where extra strength is needed.

Start sewing
Start the machine and sew until the machine stops automatically. The machine will sew a tacking 1.5 cm (5/8”) long.

Sewing a shorter tack
To sew a tack shorter than 1.5 cm (5/8”), first stop the machine after sewing the required length, then press the reverse button. The tack length has been determined. Start the machine again and continue sewing until the machine stops automatically.

Sewing a same-size tacking
Simply start the machine to sew another tack at the same size.

NOTE:
To reset the size of the tacking, select the other stitch pattern and reselect the tacking.
Adjusting the shape of an eyelet
Correct the shape of the eyelet as follows:
“L3” is the default setting value.
If the eyelet gap overlaps, press the “+” sign on the stitch length adjusting key to make the darn even.
If the eyelet gap opens, press the “−” sign on the stitch length adjusting key to make the darn even.

NOTE:
The shape can be adjusted within L1 to L5.

Eyelet
1. Stitch pattern: 22
2. Thread tension dial: 1 to 4
3. Presser foot: Satin stitch foot F

The eyelet is used for belt holes etc.

Starting to sew
Lower the needle at the starting point and lower the presser foot. Start the machine.
The machine will stop automatically when completed.

Starting point
Open the eyelet with an awl, eyelet punch or pointed scissors (an awl, eyelet punch or pointed scissors are not provided with the machine).
Place the right sides of the fabric together. Attach the zigzag foot and seam up to the end of the zipper opening, with a 2 cm (13/16˝) seam allowance. Reverse the stitch to fasten the seam. Manually increase the stitch length to 5.0 and baste the zipper opening with the thread tension loosened to 1-3.

**Zipper Sewing**
1. Stitch pattern: 00
2. Thread tension dial: 1 to 4
3. Presser foot: Zigzag foot A
   Zipper foot E

**Attaching the zipper foot**
Fit the pin on zipper foot E to the groove on the foot holder.
1. Groove
2. Pin

(A): To sew the left side of the zipper, attach the zipper foot with the pin on the right-hand side.
(B): To sew the right side of the zipper, attach the zipper foot with the pin on the left-hand side.

**Fabric preparation**
Add 1 cm (3/8˝) to the zipper length. This is the overall opening size.
1. Right side of the fabric
2. 1 cm (3/8˝)
3. Opening size
4. Zipper length
5. End of the zipper opening

Place the right sides of the fabric together. Attach the zigzag foot and seam up to the end of the zipper opening, with a 2 cm (13/16˝) seam allowance. Reverse the stitch to fasten the seam. Manually increase the stitch length to 5.0 and baste the zipper opening with the thread tension loosened to 1-3.

5. End of the zipper opening
6. 2 cm (13/16˝)
7. Basting
8. Reverse stitches
9. Seam stitches
Start sewing

1. Fold back the left seam allowance. Turn the right seam allowance under to form a 0.2 to 0.3 cm (1/8”) margin. Place the zipper teeth next to the fold and pin in place. Set the stitch length and thread tension back to the original setting.
   - 0.2 to 0.3 cm (1/8”) margin
   - Zipper teeth
   - Fold
   - End of the zipper opening
   - Opening size

2. Attach the zipper foot E with the pin on the right hand side.
   Lower the foot onto the topside at the end of the zipper opening so that the needle pierces the fabric next to the fold and the zipper tape.

⚠️ CAUTION:
Be sure that the needle does not strike the presser foot or zipper teeth when the zipper foot is attached.

3. Sew through all layers next to the fold.
   Stop the machine 5 cm (2”) before the foot reaches the slider on the zipper tape.
   Lower the needle slightly into the fabric.
   Raise the foot and open the zipper to clear the slider.
   Lower the foot and stitch the remainder of the seam.
   - Slider
   - 5 cm (2”)
4 Close the zipper and spread the fabric open flat with the right side facing up. Attach the Zigzag foot A. Adjust the stitch length to 5.0, stitch width to 3.5 (default value) and the thread tension dial to 1. Baste the opened fabric and zipper tape together.
8 Basting stitch
9 Zipper tape

5 Attach the zipper foot E with the left pin. Adjust the stitch length and the stitch width to default value, and thread tension dial to “4”. Backstitch across the end of the opening 0.7-1 cm (3/8”) and turn the fabric 90 degrees.
10 0.7-1 cm (3/8”)

! CAUTION:
Be sure that the needle does not strike the presser foot or zipper teeth when the zipper foot is attached.

6 Stitch through the garment and zipper tape, guiding the zipper teeth along the side edge of the foot. Stop the machine 5 cm (2”) before the foot reaches the slider on the zipper tape. Lower the needle into the fabric, and raise the foot. Remove the basting stitches.
11 5 cm (2”)
12 Basting stitches

7 Open the zipper, then lower the foot and stitch the remainder of the seam. After sewing is finished, remove the basting stitches on the upper fabric.
13 Basting stitches on upper fabric
Blind Hemming

1. Fold a hem with the wrong side of the fabric up to form a 0.5 cm (1/4˝) allowance.
   (1) Wrong side of fabric
   (2) 0.5 cm (1/4˝)

   (1) On heavyweight fabrics that tend to ravel, the raw edge should be overcast first.
   (2) Fold the hem under the fabric for lightweight fabrics.

2. Place the fabric so that the fold is next to the guide on the foot.
   Lower the presser foot.
   Adjust the needle drop position if necessary.

3. Sew while guiding the folded edge.
   (3) Folded edge
   (4) Guide

4. Open the fabric after sewing is finished.

NOTE:
If the needle pierces too far left, the stitch will show through on the right side of the fabric.

Adjusting the needle drop position
Adjust the needle drop position as follows:
Press the “–” sign on the stitch width adjusting key 1 to move the needle to the right.
Press the “+” sign on the stitch width adjusting key 1 to move the needle to the left.

1 Stitch width adjusting key

The LCD display shows a distance from the center needle drop position in millimeters.
The needle drop position can be varied from 0.0 to 1.2.

NOTE:
The needle drop position can be moved, but the stitch width will remain the same.
**Button Sewing**

1. **Stitch pattern:** 06
2. **Thread tension dial:** 3 to 7
3. **Presser foot:** Satin stitch foot F
4. **Feed dog:** Lowered

Lower the feed dog.  
Set the speed control slider at a slower speed.  
Set the stitch length at the minimum (0.2).

- **Stitch length (0.2)**

Match the holes of button to the horizontal slot of the presser foot and lower the foot to hold the button in place.

Adjust the stitch width so the needle will enter the left hole of the button.  
Turn the handwheel so that the needle will enter the right hole of the button. Readjust the stitch width if necessary.

- **Stitch width (adjust to span of holes)**

Stitch several times.

After you finish sewing, cut the thread but leave 10 cm (4") of threads at the end.

Pull the bobbin thread to draw the top thread to the reverse side of the fabric and knot the threads.

After the button sewing is completed, raise the feed dogs for normal sewing.

**Gathering**

1. **Stitch pattern:** 00
2. **Thread tension dial:** 1
3. **Presser foot:** Zigzag foot A

Loosen the thread tension to “1” and increase the stitch length to 5.0.

Sew two rows of straight stitches 0.6 cm (1/4") apart.  
Knot the threads at the beginning.

Pull the bobbin threads at the end to gather the fabric.

Knot the threads at the end and distribute the gathers evenly.
Use a lightweight fabric (tricot, for example). Fold the fabric in bias as shown and stitch on the fold.

Allow the needle to barely clear the folded edge to create a shelled edge.

If you sew rows of shell tuck, space the rows at least 1.5 cm (5/8") apart.

You can also sew shell tuck on knits or soft silky woven fabrics, in any direction.
Applette

1. Stitch pattern: 23
2. Thread tension dial: 1 to 4
3. Presser foot: Satin stitch foot F
4. Presser foot pressure dial: 1 to 3
* The stitch patterns 24-25 can also be used.

Place an applique on the fabric and baste or pin it in place. Lower the needle at the outer edge of the applique. Sew while guiding the fabric so the needle falls along the outer edge of the applique.

1. Applique
2. Outer edge

When turning a sharp corner, stop the machine with the needle at the outer edge of the applique. Raise the foot and pivot the fabric around the needle to change the sewing direction.

- Adjusting the stitch width
Select pattern 23.
Press the “–” sign on the stitch width adjusting key 3 to decrease the stitch width 5.
Press the “+” sign on the stitch width adjusting key 3 to increase the stitch width 6.
3. Stitch width adjusting key

The stitch width will be varied based on the centered needle drop position 4.

(A) The stitch patterns 23 have a fixed center needle drop position. The stitch width changes symmetrically.
(B) The stitch patterns 24 and 25 have a fixed right needle drop position. When you change the stitch width, the left needle drop position will change.

Pintucking

1. Stitch pattern: 03
2. Thread tension dial: 3 to 6
3. Presser foot: Blind hem foot G

Fold the fabric with the wrong sides together. Place the folded fabric under the blind hem foot. Align the edge of the fold with the guide on the foot, and lower the foot.

Sew while guiding the edge of the fold along the guide. Open the fabric and press the tuck to one side.
Fringing adds a special touch on table linens and shawls. Choose a firm, woven fabric like linen where threads can be removed easily.

1. Carefully cut the fabric on the grain. Remove a single strand of yarn or thread where the fringing is to begin.

2. Sew down the left side so the right hand stitches fall in the open space.

3. Remove all excess yarn located to the right of the stitching and create a fringe.

Drawn work uses the same method as fringing. Choose a firm, woven fabric like linen where threads can be removed easily.

1. Carefully cut the fabric on the grain. Determine the width of the drawn work and remove one strand of yarn or fabric thread at each end.

2. Sew down the left side, guiding the fabric so the right hand stitches fall in open space. After finishing the left side, turn the fabric around 180°. Sew down the other side.

3. Remove the yarn or fabric threads between the stitching.
You can make cross stitch designs with these patterns, in half the time it would take if embroidered by hand.

Use a plain close woven fabric such as linen or wool flannel. If you use light weight fabric, apply a tear away backing for support.

Sew from the center of the design outward.

If you press the auto-lock button before sewing, the machine will sew one unit of the cross stitch and stop automatically.

**Cross Stitch**

1. Stitch pattern: 33
2. Thread tension dial: 3 to 6
3. Presser foot: Satin stitch foot F

You can make cross stitch designs with these patterns, in half the time it would take if embroidered by hand.

Use a plain close woven fabric such as linen or wool flannel. If you use light weight fabric, apply a tear away backing for support.

Sew from the center of the design outward.

If you press the auto-lock button before sewing, the machine will sew one unit of the cross stitch and stop automatically.

**Fagoting**

1. Stitch pattern: 32
2. Thread tension dial: 3 to 6
3. Presser foot: Satin stitch foot F

* The stitch patterns 13 and 30 can also be used.

Use these stitches to join two pieces of fabric to create an open work appearance and add design interest.

Fold under each fabric edge 1.5 cm (5/8˝) and press. Pin the two edges to paper or tear backing 0.3–0.4 cm (1/8˝) apart.

Sew slowly, guiding the fabric so the needle catches the folded edge on each side.

After sewing is finished, tear away the paper.

1. 0.3–0.4 cm (1/8˝)
2. Paper

**French Knots**

1. Stitch pattern: 35
2. Thread tension dial: 5 to 8
3. Presser foot: Satin stitch foot F

Select the stitch pattern 35.

Tighten the thread tension to 5-8 when sewing.
Smocking

- **Stitch pattern:** 38
- **Thread tension dial:** 3 to 6
- **Presser foot:** Satin stitch foot F

* The stitch pattern 30 can also be used.

**Smocking**

Use a soft and lightweight fabric such as batiste, gingham or challis.

Cut the fabric three times wider than the projected width.

Select straight stitch, set stitch length at “5.0” and loosen the thread tension.

Sew rows of straight stitches 1 cm (3/8”) apart across the area to be smocked. Knot the threads along one edge. From the other edge, pull the bobbin threads to distribute the gathers evenly.

1. 1 cm (3/8”)
2. Knotted thread

Set the thread tension to 3–6 and select a smocking stitch pattern.

Sew the smocking stitch pattern between the rows of straight stitches.

Remove the straight stitches by pulling them out.

3. Straight stitch

---

**Scallop Stitch**

- **Stitch pattern:** 27
- **Thread tension dial:** 3 to 6
- **Presser foot:** Zigzag foot A

Sew the stitches approximately 1 cm (3/8”) inside the fabric edge.

Trim the outside of the stitches as shown. Make sure not to cut the thread.
You can close quilt layers and using the clasp stitch. Select the clasp stitch. Press the auto-lock button. Start sewing. The machine sews clasp stitch and locking stitch then stops automatically.

1. Auto-lock button

**Clasp Stitches**

1. Stitch pattern: 39
2. Thread tension dial: 3 to 6
3. Presser foot: Satin stitch foot F

For better sewing results, interfacing should be used on the wrong side of the fabric when you use stretch or elastic fabrics. Press the auto-lock button to finish the end of the pattern.

1. Auto-lock button

**Satin Stitches**

1. Stitch pattern: 41
2. Thread tension dial: 1 to 4
3. Presser foot: Satin stitch foot F

* The stitch patterns 40 and 42-43 can also be used.
For the best sewing results, carefully align and guide the fabric when you sew with decorative stitches. Use a tear-way backing if necessary.

**Decorative Stitches**

1. Stitch pattern: 44
2. Thread tension dial: 3 to 6
3. Presser foot: Satin stitch foot F

* Stitch patterns 45–49 can also be used.

Correcting Deformed Stitch Patterns

The sewing results of stretch stitch patterns may vary depending on sewing conditions, such as sewing speed, fabric type, number of layers etc. If stretch stitch patterns are deformed, correct them by turning the feed balancing dial with the screwdriver.

- If the pattern is compressed, turn the dial in the direction of “+”.
- If the pattern is drawn out, turn the dial in the direction of “–”.

* Feed balancing dial
CARE OF YOUR MACHINE

Cleaning the Hook Race and Feed Dog

⚠️ WARNING:
Turn the power switch off and unplug the machine before cleaning.
Do not dismantle the machine other than as explained in this section.

⚠️ CAUTION:
Do not store the machine in a high-humidity area, near a heat radiator, or in direct sunlight. Store the machine in cool dry place.

NOTE:
Clean the outside of the machine with a soft cloth and neutral soap.

Press the needle up/down button to raise the needle, turn the power switch off, then unplug the sewing machine. Remove the needle and presser foot.
Remove the hook cover plate by sliding the hook cover plate release button to the right. Take out the bobbin. Brush out dust and lint. (You may also use a vacuum cleaner.)

1. Remove the setscrews on the needle plate with the screwdriver supplied with the machine. Remove the needle plate.
   1. Setscrew
   2. Needle plate

2. Lift up the bobbin holder and remove it.
   3. Bobbin holder

3. Clean the bobbin holder with a lint brush.
   4. Lint brush

4. Clean the feed dog and hook race with the lint brush.
   5. Feed dog
   6. Hook race

5. Clean the inside of the hook race with a dry cloth.
   You may also use a vacuum cleaner.

Installing the Bobbin Holder

1. Insert the bobbin holder so that the knob fits next to the stopper in the hook race.
   1. Bobbin holder
   2. Knob
   3. Stopper

2. Attach the needle plate with the setscrews.
   After cleaning the machine, make sure the needle and presser foot are attached.
   4. Needle plate
   5. Setscrew
Problems and Warning Signals

If a buzzer sounds and the LCD display shows a warning sign, follow the guidance below.

<table>
<thead>
<tr>
<th>Warning Sign</th>
<th>Cause</th>
<th>Try this</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1" alt="Warning Sign" /></td>
