⮔ Updates
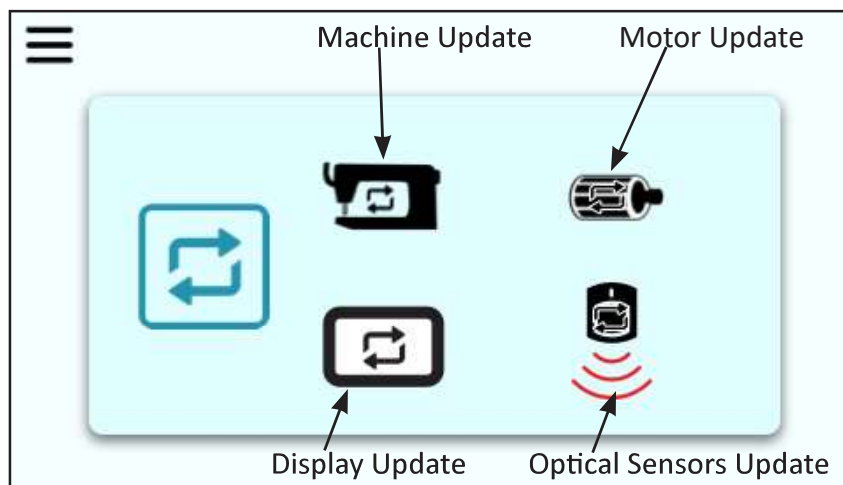

From time to time, it may be necessary to perform updates to your quilting machine's software. When the update screen is open, this is what you will see:

Through this screen, you can update the display and machine software by using a USB drive (with the updated firmware versions) inserted into the USB port at the bottom of the touchscreen.

✎ **NOTE:** When you need to update both the Machine or Motor and Display software at the same time, **ALWAYS COMPLETE THE DISPLAY UPDATE FIRST.** Then proceed with the Machine update.

Machine Update   Motor Update

Display Update   Optical Sensors Update

To complete an update, follow these steps:

1. Download the update(s) and save to a USB drive.

    For the latest software update, visit **https://handiquilter.com/machine-software-updates**
    and select the Moxie ST tab.

2. Insert the USB drive into the USB port on the bottom of the touchscreen on the Moxie ST.

↻ **IMPORTANT:** the download must be unzipped and on the root directory of the USB

✎ **NOTE**: This USB port is used for both the Machine and Display updates.

✎ **NOTE:** When you need to update both the Machine or Motor and Display software at the
same time, **ALWAYS COMPLETE THE DISPLAY UPDATE FIRST.** Then proceed with the
Machine update.

3. Press the Machine icon, the Display icon, the Motor icon, or the Optical Sensors icon to
    begin the update.
    You will see a progress bar like the one below while the **MACHINE** update is being
    completed.

After an update is complete, the display will go dark briefly and reboot to the Home screen.

If you see either of these icons, there is a problem with either the USB drive or the update file..
